Delhi, New York 13753**

**Telephone: 607-832-5110**

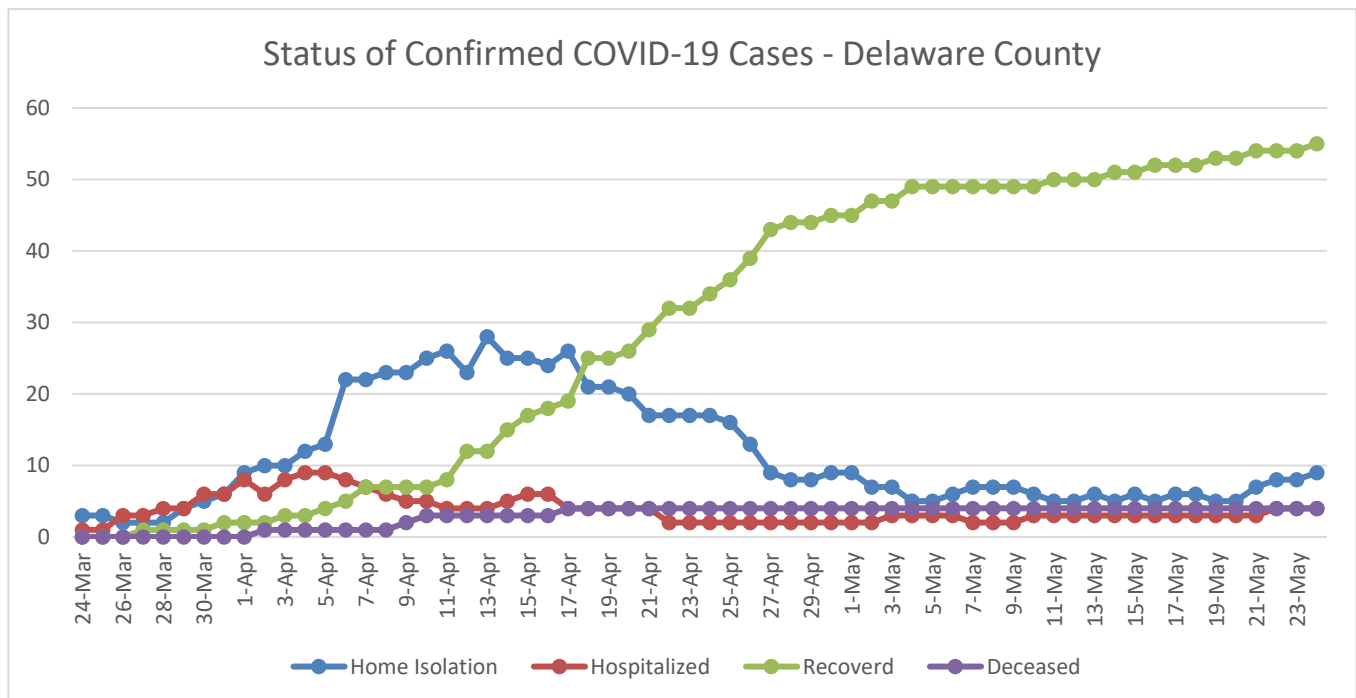

**Tina B. Molé, Chairman  
Christa M. Schafer, Clerk**

### PRESS RELEASE May 24, 2020

Delaware County is reporting two new cases of COVID-19 today and one additional recovery. The known active cases in the County is now 13.

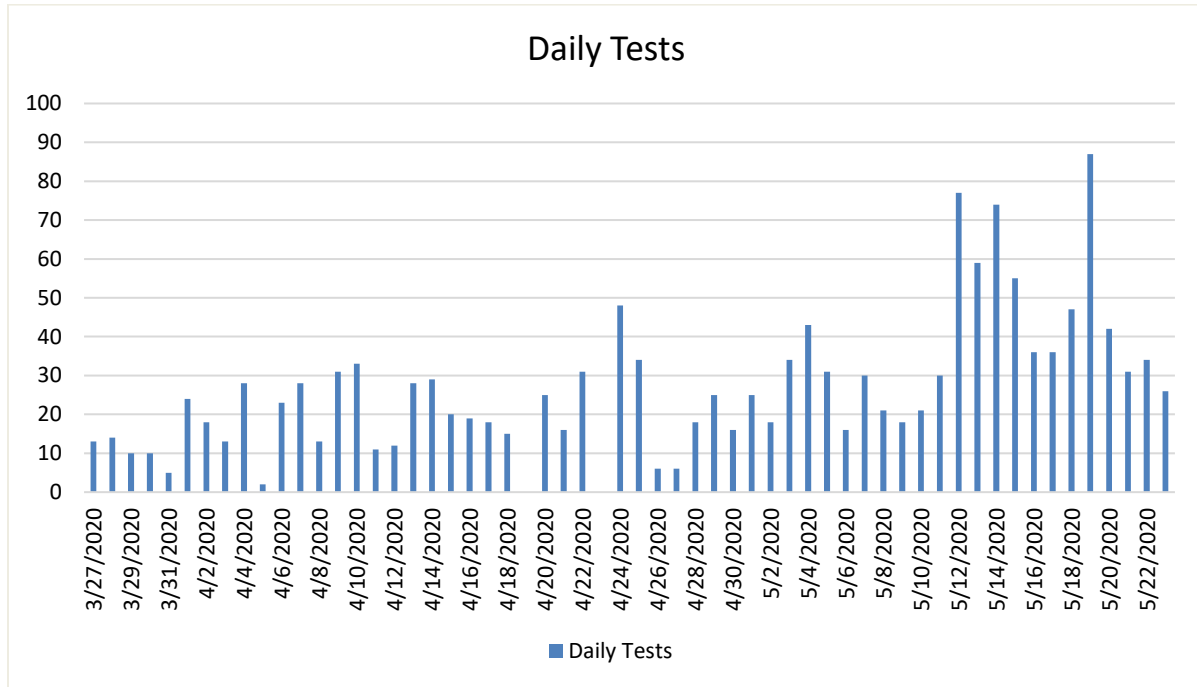

To date there have been 72 confirmed positive cases of COVID-19 in Delaware County, with an additional 23 people under mandatory quarantine and 3 people under precautionary quarantine. There have been 1498 negative results reported and we are waiting for results from 13 tests. As of today 4 of the confirmed active cases are isolated and receiving care in the hospital, 9 are isolated and being cared for at home, 4 people have died and 55 have fully recovered and are no longer isolated or receiving care.

The following chart is a representation of positive cases since March 23, 2020.

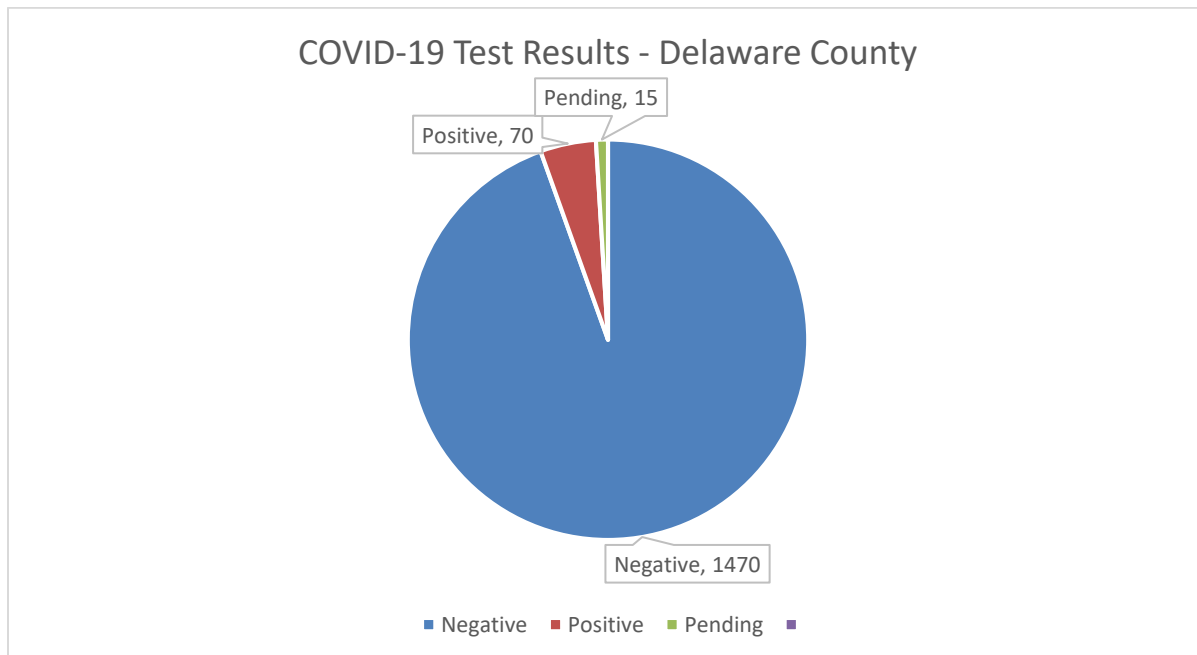

Delaware County remains vigilant in testing residents with 1605 people tested to date. Currently 3.57% of the total population has been tested with test results being reported every day. It is important to understand that there have been 1867 tests performed which is being tracked by the regional control

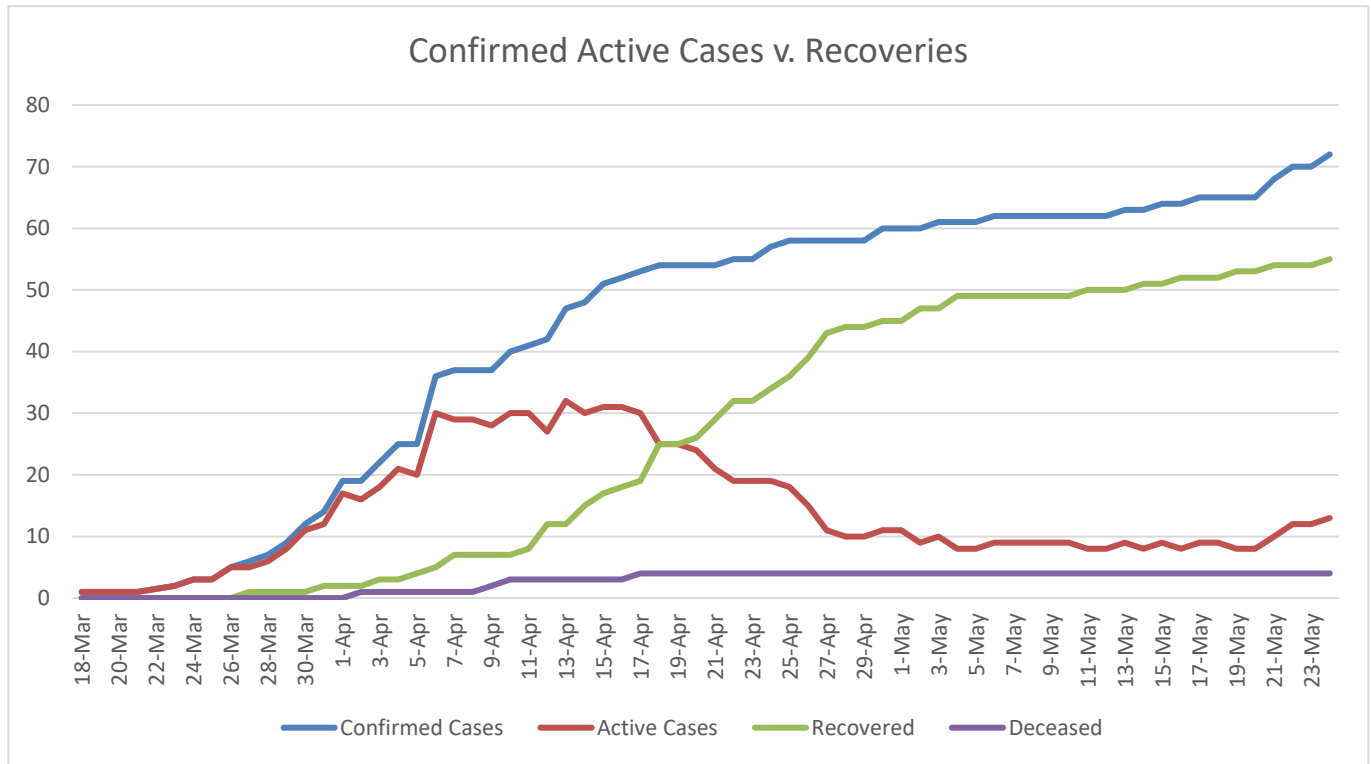

room. The numbers are different because the tests performed includes 262 tests that have been completed on people that have already been tested. These include those individuals that may need a negative test result as proof to return to work, essential workers that have had multiple potential exposures or even a person that is going into the hospital for an unrelated procedure and is tested as a precautionary measure. The following chart represents the total number of new daily tests on residents that have been done since March 26, 2020. It is not reflective of the total number of tests performed. We are working closely with the rest of the region to continue aggressive testing of residents so we can track cases as soon as possible and keep everyone safe as we are reopening the economy.

The following pie chart illustrates the amount of testing and the results reported:

The following chart represents the total number of confirmed cases in Delaware County in relationship to the number of those cases that have been discharged from care, deceased and active cases of the disease. The number of known active cases as of today is 12 and the number discharged is 54 while the number deceased remains 4.

This weekend we are celebrating Memorial Day. We want everyone to enjoy the unofficial start to summer and remember the true meaning of Memorial Day as we commemorate those that have lost their lives in service to our country. Please take a moment this weekend to celebrate these veterans by placing a sign or flag in your yard, observing a moment of silence, record a patriotic song and post it to social media, or organize a community/neighborhood sound off. This is an important day for Americans and we should celebrate it in the safest manner possible.

If you are planning a gathering this weekend please remember to encourage social distancing, keep your gathering to 10 or fewer people if not living in the same household, encourage the use of face coverings and practice good hand washing. Enjoy the holiday and please stay safe.
